HMWS E-Stop

Product Overview

The HMWS E-Stop offering is proudly our first venture into manufacturing products outside the traditional wiring harness business.

The HMWS E-Stop design not only meets the primary function of an E-Stop, but also considers the environments it operates in and associated installation and maintenance practices. Our plug and play philosophy incorporates a bulkhead connector making installation simple and easy, external mounting holes eliminating the need for disassembly before installation, is IP 68 rated (6P NEMA rating) and contains 3 sets of telemechanique contacts to cater for all configurable possibilities.

Product Description

The HMWS E-Stop toughness isn't just in its appearance.
The Solution:

- The outer casing is made from stainless steel and is powder-coated to improve resistance to harsh and corrosive environments..
- IP68 (6P NEMA rating) rating further enhances its durability, particularly when exposed to high-pressure water cleaning.
- The plug and play design makes installation and replacement easy with a bulkhead connector fitted and external mounting holes that eliminate the need for disassembly before installation.
- Installation and replacement can be undertaken by non-trade and non-electrical trades.
- 3 sets of telemechanique contacts, 2 normally closed and 1 normally open caters for any wiring configuration and E-Stop category (0, 1 and 2).
- Configurable to all stop category definitions.
- 60mm mushroom head.
- Option for LED illumination.
